Getting Your Worms

Once you order your Worms from Jim's Worm Farm, prep a bucket to receive them. If they come in before your bucket is ready, Jim has a plan to help you; there are instructions in the box that your worms come in.

Tools:

The only tool is a box cutter.

Material:

Worms from Jim's Worm Farm <https://unclejimswormfarm.com/?affiliates=755>

Directions:

1. Remove the worms from the shipping box as soon as possible. The bag that the worms come in is an 'airbag'; it allows air to flow into it, thus allowing your worms to breathe.
2. Take a quick smell check to make sure that they didn't die.
3. Add some Corn Meal to your bucket.
4. Add water to wet the Corn Meal.
5. Pour in your worms and spread them around.
6. Check on your worms in a few days to ensure most are alive.
